

*Intelligent Retrieval
Information System*

<http://www.irissearch.net>

What is IRIS?

- 🔍 **IRIS** is an **I**ntelligent **R**etrieval **I**nformation **S**ystem that goes beyond enterprise search capabilities
- 🔍 IRIS uses state-of-the-art cognitive models, knowledge management principles and intelligent agents to find, process and derive actionable intelligence
- 🔍 The IRIS suite consists of two products:
 - Desktop IRIS
 - Network IRIS

Why IRIS?

- 🔍 Organizations need to offer adequate e-discovery mechanisms to their employees, customers and partners to find the right information in a fast and reliable manner:
 - In their corporate networks
 - In their desktop
 - In the World Wide Web
- 🔍 Employees, customers and partners need to have the ability to share this information in a secure environment

Who uses IRIS?

Anyone can use IRIS

- **Desktop IRIS** allows you to find any information stored in your desktop computer, network paths and Outlook email
- **Network IRIS** allows your employees to find any information stored in any of your corporate networks, independent of geographical location
- **The IRIS Suite** allows you to **always** find the information you are looking for

What can IRIS do for you?

Increase Search Quality & Save Time

- Improves the quality of decision-making by incorporating user-friendly customization searches

Increase Access to Information

- Provides advanced search capabilities
- Provides offline access to websites
- Allows access to shared knowledge created or collected by other users
- Offers support for multiple languages

Flexibility

- Easy to deploy, flexible and affordable
